

I've been told that people aren't able to get the schedule on their phone, even though I have changed the schedule. If you are using Google Chrome on your phone, this is what is recommended to remedy it. I have the same issue, and this fixes it and I can get the schedule.

- 1.) Check your download folder and delete any old HGaBC schedules.
- 2.) Go to the main page of the Holtongunandbowclub.com website.
- 3.) You will see 3 dots in the upper right-hand corner of the browser. Click on those.
- 4.) Look at the menu for 'Delete browsing data' and click it. (it's usually right below History)
- 5.) Then change from 'Last 15 minutes' to 'All time'.
- 6.) Further down, click on 'More options'.
- 7.) Check the box next to history from holtongunandbowclub.com. This will only affect the Holton website.
- 8.) **Make sure that is the only box that is checked.** (You may need to check the 'Cached images and files' box also if the other doesn't work)
- 9.) At the bottom of the page, click 'Delete data'.

Your phone keeps a copy of the website and information in memory so that it will load more quickly. Unfortunately, it doesn't always get the most recent version. These steps will make you download more data, but it will get the latest version.

If this doesn't work for you, please let me know. You may e-mail me at holtongunandbowclub@yahoo.com. There is another way to force your phone to get the new schedule, but it isn't as easy as what I have described.
